

The objective of the faculty is to develop highly skilled and compassionate professionals in their chosen careers who aspire to the highest standards of integrity and ethical behavior. Our focus on education excellence and innovative research is reflected by the academics and researchers across Somalia higher education institutions either Governmental or Non-Governmental.

We believe that Health is influenced by many factors in our community and is underpinned by knowledge that ranges from the cultural to scientifically sound experiments , so the faculty degrees reflect the fact that healthcare goes beyond the work done by doctors, nurses, psychologists, dentists and other health practitioners.
